Basis for polynomials spaces. Tables 0.3 and 0.4 list all polynomials comprising the space of gradients and its complement. Figure 0.4 is an schematic representation of Pascal's pyramid, which contains the ordering of the polynomials used in the implementation of the method. \bar{x} , \bar{y} and \bar{z} should be understood as $\frac{(x-x_0)}{d}$, $\frac{(y-y_0)}{d}$ and $\frac{(z-z_0)}{d}$, where the subscript 0 indicates the barycenter of the element and d its diameter.
